GRAVEL

UTILIZATION

THIS JERSEY WAS CREATED MAINLY FOR GRAVEL AND E-BIKE USERS IN THE LATE SPRING-SUMMER-EARLY AUTUMN PERIOD. IT HAS A MODEL SUITABLE FOR EVERYONE AND FOR DAILY USE, WITH A SOFT FIT AND UNIQUE DETAILS THAT DETERMINE THE MBWEAR STYLE.

FEATURES

The Gravel AllDay jersey is the conception of the future that unites the cyclist at the first ride with the most competitive sportsman.

The New Antibes fabric characterizes almost the entire shirt and was chosen because its cotton hand, elasticity and high breathability are its strengths.

A prominent and elegant element are the 4 buttons that differentiate it from a common jersey and that allow the people to use it even extra bike.

The black Time Out fabric of the 2 large rear pockets ensures resistance even to "heavy loads", avoiding the classic "fall of the rear pockets".

There is also a flap closure that facilitates the use of the pockets and at the same time gives a touch of style.

In the central part of the pockets there is a band of Maribor Reflex fabric that guarantees the right visibility and increases the safety of the cyclist.

JERSEY GRAVEL ALLDAY

UTILIZATION

THIS JERSEY WAS CREATED MAINLY FOR GRAVEL AND E-BIKE USERS IN THE SPRING-AUTUMN PERIOD BUT CAN ALSO BE USED IN SUMMER THANKS TO THE THERMAL INSULATING PROPERTIES OF WOOL.

FEATURES

Short sleeve jersey in vintage wool blend fabric with polyester and recycled polyester, in the right combination to ensure breathability but also thermal insulation (from heat and cold).

It has a French ("V") neck, set-in sleeves sewn with 2 needles and without elastic so as to make the softness of the fabric feel,

long covered YKK zipper with CAMLOCK self-locking puller.

There are 3 rear pockets with hidden internal elastic to give continuity of design.

The central pocket has a 5cm reflex insert in order to increase the visibility of the cyclist.

Knitted bottom turned up with two needles at the front while a 2cm elastic has been inserted in the bottom of the back for excellent adherence.

All the colors recall a different element of nature that was photographed and subsequently transported in graphics on the jersey in order to accompany the cyclist on his "green" journey.

JERSEY GRAVEL NATURE

UTILIZATION SHORT

THIS SHORT WAS CREATED FOR GRAVEL - E-BIKE - MTB USE, THEREFORE FOR ALL OFF-ROAD ACTIVITIES OR ACTIVITIES THAT REQUIRE MAXIMUM COMFORT AND VERSATILITY.

FEATURES

Technical shorts designed for next-generation cycling, comfortable, ultra-resistant and versatile.

Its line is soft and without the pad inside; the technical structure leaves the pedal free even if it has two large pockets in the front / side with die-cast zips and internal fastening to give stability to the objects that are inserted.

In the back we find:

1. the shaped waist that keeps the shorts snug in the lumbar area;
2. a reflex collar that helps visibility;
3. a flap with a mesh fabric inside that helps the boxer to breathe.

The front is made with a two snap button clip closure.

The Gravel Explore short is the right mix of elegance, comfort and MBwear quality.

UTILIZATION BOXER

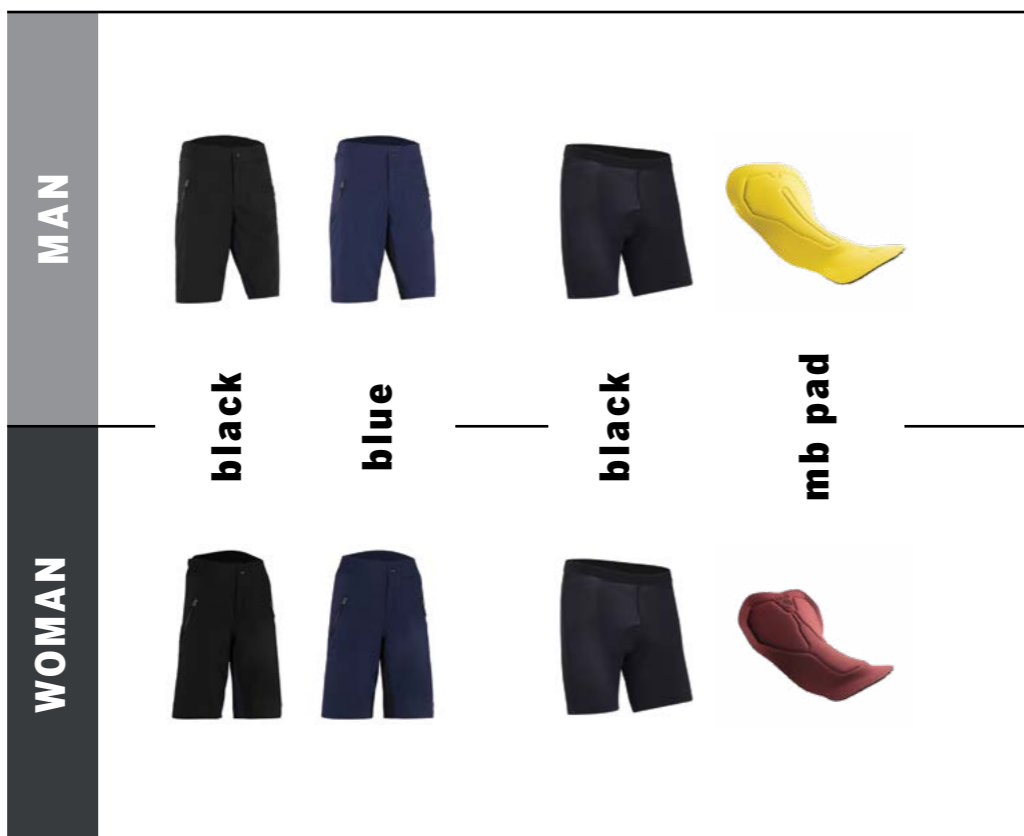

THIS BOXER WAS CREATED FOR GRAVEL - E-BIKE - MTB USE IN COMBINATION WITH THE GRAVEL EXPLORE SHORT.

FEATURES

Underwear is our second skin when we go out to train on a bicycle, so we need to pay attention to the smallest details.

This boxer with a "green" soul is made entirely of a breathable recycled mesh fabric that is very elastic and comfortable.

The MBwear-Cytech chamois helps absorb shocks during rides on uneven terrain, guaranteeing comfort even for long periods.

COMPOSITION

7132 Supplex Lycra: 94% Polyamide, 6% Lycra

SHORT AND BOXER GRAVEL EXPLORE

UTILIZATION

THIS HIGHLY TECHNICAL AND VERSATILE GARMENT IS THE CLASSIC ELEMENT TO ALWAYS CARRY WITH YOU IN AUTUMN-WINTER-SPRING. IDEAL AS SOON AS YOU LEAVE HOME IN THE WINTER, BEFORE THE HOTTEST HOURS, FAITHFUL COMPANION IN CASE OF RAIN OR COLD WIND. PERFECT TO WEAR BEFORE FACING LONG DESCENTS TO KEEP YOUR WARMTH AND AT THE SAME TIME HAVE ACCESS TO THE POCKETS OF THE UNDERLYING JERSEY WITH GREAT EASE THANKS TO THE REAR OPENING.

FEATURES

The Conti-Tech jersey is the emblem of versatility.

It protects both from the wind and from the worst weather conditions as the materials used guarantee resistance to a water column greater than 10 thousand mm.

It is composed of Tallin as the main fabric which is then coupled in two layers; this helps transpiration from the inside to the outside and guarantees excellent

resistance to rain.

The Maribor Reflex allows you to increase visibility even in the night illuminated by the headlights, allowing use even in the poorest conditions of visibility.

The Nilo fabric in the hips and under the sleeve provides the right elasticity to the garment in order to avoid annoying pressures and give the right comfort.

The Conti-Tech jersey is composed of two slits in the back that allow you to use the pockets of the underlying jersey without any difficulty, allowing the cyclist to travel safely.

CONTI-TECH GRAVEL/WINTER JERSEY

WINTER

UTILIZATION

WHEN SUMMER ENDS AND WE ENTER AUTUMN, WE STILL HAVE A FEW MONTHS OF GREAT CYCLING, BUT WE NEED TO START DRESSING WARMER AND WE MISS THE FEELING OF JUST WEARING A JERSEY. THAT'S WHY WE CREATED LEVANTE, THE IDEAL JERSEY FOR AUTUMN-WINTER AND EARLY SPRING. THE RIGHT BALANCE BETWEEN FREEDOM, LIGHTNESS AND PROTECTION.

FEATURES

Levante: the name comes from the term used for the typically cool, wet wind that this jersey will protect you from.

The front part is made of an exceptional Recycled Fleece by Primaloft, a completely recycled fabric that promotes environmental sustainability by reducing the consumption of natural resources and with a weight of 75g it maintains a correct body temperature even during autumn outings.

The outer part is made of Monviso fabric that will protect you from wind and rain but at the same time, thanks to its special construction, will help moisture to move

away from your skin.

The sleeves, sides and back of the jersey are made of Blizzard Native fabric, which is also a recycled fabric; its characteristic elasticity guarantees an excellent fit.

The Maribor reflex fabric in the central pocket enhances visibility and is a stylish element that forms a link between the various MBwear collections.

To further increase visibility, the final part of the three pockets is formed by a reflex tape to make your bike rides even safer.

The raw-cut 20440 fabric at the bottom of the jersey makes the final part of the garment elegant and comfortable, preventing the entry of air without creating annoying pressure. The YKK zip with puller and the MB WEAR inner neck sweatband make each garment unique.

LONG SLEEVE JERSEY LEVANTE

UTILIZATION

THIS HIGHLY TECHNICAL GARMENT IS THE MOST VERSATILE PRODUCT IN THE MBWEAR RANGE. EXCELLENT FOR ANY WINTER CONDITIONS BUT ALSO SUITABLE FOR THE FIRST AUTUMN CHILLS.

FEATURES

Eccellente: the name was not born at random but was the expression of those who were the first to test it.

This is a jacket that every cyclist should have in their wardrobe, ready for every use.

The front and back are made of an exceptional Primaloft Recycled Fleece, a completely recycled fabric that promotes environmental sustainability by reducing the consumption of natural resources and with a weight of 75g it maintains a correct body temperature even during winter or autumn rides.

The outer part is made of Monviso fabric that will protect you from wind and rain but at the same time, thanks to its special construction, will help moisture to move away from your skin.

The underarms and sides are made of

Blizzard Native fabric, also a recycled fabric; its characteristic elasticity guarantees an excellent fit.

The Maribor reflex fabric in the central pocket promotes visibility and is a stylish element that forms a link between the various MBwear collections.

To further increase visibility, the final part of the two pockets is formed by a reflex

JACKET ECCELLENTE

UTILIZATION

THIS HIGHLY TECHNICAL GARMENT IS THE WINTER JACKET. GREAT FOR ALL WINTER CONDITIONS. THE FIRST WINTER GARMENT CREATED BY MBWEAR COULD NOT BE AN ATTEMPT, IT HAD TO BE A MASTERPIECE. THAT'S WHY WE DREW ON THE EXPERIENCE OF MANY YEARS OF TRAINING AND RACING IN EXTREME CONDITIONS, IN ORDER TO ELIMINATE THE FLAWS OF ALL JACKETS USED UP TO NOW. THUS THE BORA JACKET WAS BORN.

FEATURES

The cycling jacket is an essential piece of equipment for every cyclist.

Essential protection for all weather conditions, it provides optimum comfort during cycling. The front and back are made of an exceptional Recycled Fleece by Primaloft, a completely recycled fabric that promotes environmental sustainability by reducing the consumption of natural resources and with a weight of 100g it maintains a correct body temperature even on the coldest rides.

The outer part is made of Monviso fabric that will protect you from wind and rain but at the same time, thanks to its special construction, will help moisture to move

away from your skin.

The sleeves and sides are made of Blizzard Native fabric, also a recycled fabric; its characteristic elasticity guarantees an excellent fit.

The Maribor reflex fabric in the central pocket and on the left forearm promotes visibility and is a stylish element that forms a link between the various MBwear collections.

To further increase visibility, the final part of the three pockets is formed by a reflex tape to make your bike rides even safer.

The raw-cut 20440 fabric at the bottom of the jersey makes the final part of the garment elegant and comfortable, preventing the entry of air without creating annoying pressure. The YKK zip with puller and the MB WEAR inner neck sweatband make each garment unique.

THERMAL JACKET BORA

UTILIZATION

THESE TIGHTS HAVE BEEN DESIGNED TO PROTECT YOU FROM THE COLD DURING YOUR WINTER OUTINGS WHILE STILL GIVING YOU GREAT FREEDOM OF MOVEMENT.

FEATURES

The Blizzard fabric used to make this garment has excellent thermal properties with an ultra-soft microfibre inner lining that helps protect against the cold and harsh temperatures. Thanks to its softness, it guarantees excellent elasticity and comfort but above all perfect breathability. Mesh braces 3JE081 again to help perspiration.

The 20440 fabric in the raw-cut leg bottom makes the final part of the garment elegant and comfortable, guaranteeing a "second skin" effect and avoiding unnecessary seams that would obstruct surface blood circulation.

The Cytech/MBwear 3D pad, suitable for long distances, perspires and keeps the ischial area dry at all times, guaranteeing the right comfort and protection when leaning.

MB PAD

The Cytech/MBwear pad uses sewn-in technology and offers an anatomical profile with great protection throughout the pelvic area.

High-density foams are applied under the top layer for maximum performance on long-distance rides. This pad guarantees adequate protection for the male anatomy

while riding, providing the perfect stability. The central channel also improves blood flow and reduces pressure and numbness. The fabric selected is EIT ECO X-Mix, which has a mixed composition of polyamide and polyester. The mixed yarn composition guarantees cooling and quick-drying functions.

WINTER LONG BIB BORA

UTILIZATION

THIS SHIRT HAS BEEN CREATED FOR ANY TYPE OF SPORTS USE, BE IT CYCLING, RUNNING OR SKIING. FOR OUTDOOR ACTIVITIES, USE IN WINTER IS RECOMMENDED.

FEATURES

Structured in such a way as to ensure maximum expulsion of wet cells to the outside, thanks to the total use of Dryarn and a different texture in the areas of greatest ventilation.

Turtleneck not too high to leave freedom of movement in the neck and possibility to wear it more freely. Specific "stretched" cuff to ensure greater elasticity and adherence, limiting the infiltration of air from the outside.

The garment is therefore able to have excellent thermal insulation, guaranteeing the user a dry skin for as long as possible and eliminating unnecessary pressure in the dermis thanks to the seamless construction, typical of all MBwear products.

Hips worked in such a way as to guarantee further elasticity to the garment and ensure that it has an excellent fit for all types of body. Design, as always, unique and elegant.

MAIN MATERIAL

1. there is no fiber that exceeds the Dryarn in conveying moisture from the inside to the outside;
2. Dryarn is the best hydrophobic fiber. Absorbs all the humidity released by your skin and carries it outside;
3. It has exceptional strength and a specific gravity lower than other fibers. So unbeatable durability and lightness;
4. extreme resistance to bacteria, fungi, microorganisms and insects. So more
5. hygienic clothes;
5. very fast drying speed and can be washed by hand, in the washing machine and dry;
6. respects nature as no dyeing operations take place to color it and it is also 100% recyclable;
7. is dermatologically tested. Dryarn is the first synthetic fiber that passes such a rigorous examination and rightfully enters an area hitherto reserved for the natural fiber par excellence: cotton.

UNDERWEAR WINTER JERSEY

UTILIZATION ARM WARMER SUN

EXCELLENT ACCESSORY FOR USE FROM LATE SUMMER TO LATE SPRING. GUARANTEES MAXIMUM FREEDOM OF MOVEMENT WHILE KEEPING ALL THE MUSCLES IN YOUR ARMS WARM.

FEATURES

Cycling sleeves are essential for protecting muscles and joints during your cycling trips in both winter and summer seasons. Our sleeves have a preformed ergonomic fit, rapid wicking away of perspiration, fast drying times and high protection.

Soft and stretchy thanks to the use of innovative fabrics, they are made from recycled Blizzard Native, which promotes the elasticity and fit of the garment while maintaining the correct muscle temperature.

The raw-cut 20440 fabric in the wrist area combines elasticity with elegance, in fact thanks to its softness it does not compress, providing excellent support during movement.

UTILIZATION ARM WARMER RAIN

EXCELLENT ACCESSORY FOR USE FROM LATE SUMMER TO LATE SPRING, ESPECIALLY ON DAYS WHEN THE WEATHER IS UNCERTAIN. GUARANTEES MAXIMUM FREEDOM OF MOVEMENT WHILE KEEPING THE MUSCLES OF YOUR ARMS WARM AND HAVE AN EXCELLENT PROTECTION FROM WATER THANKS TO DWR TREATMENT.

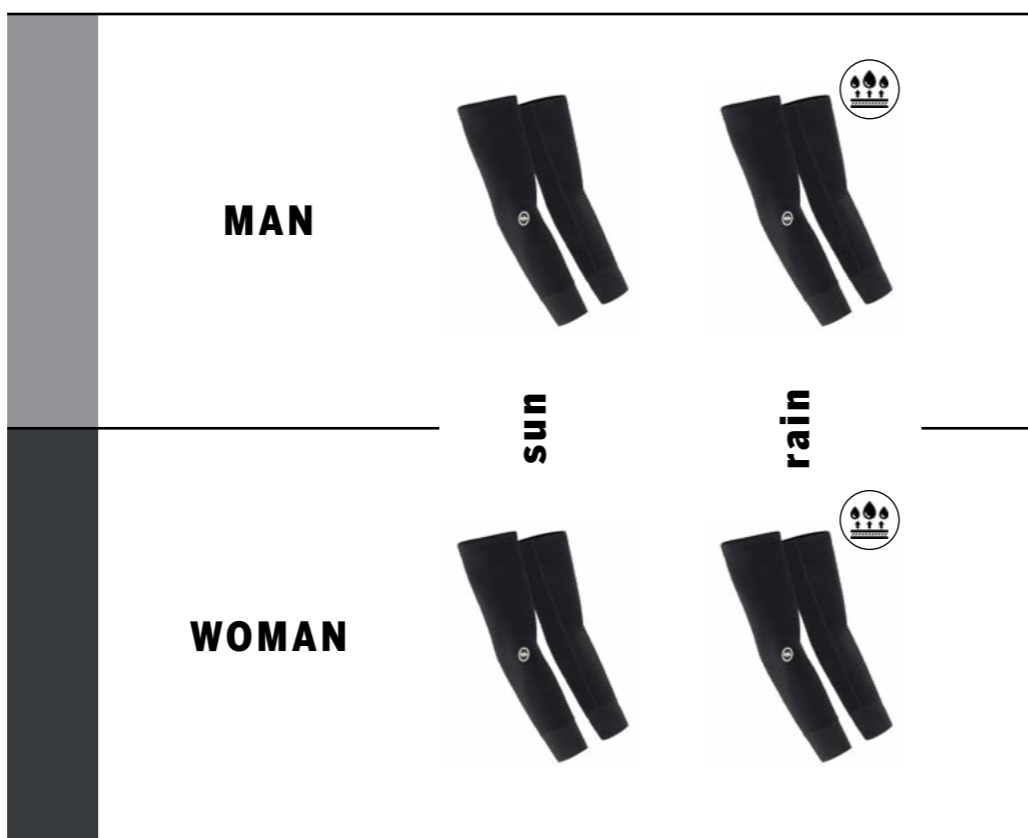

FEATURES

Cycling sleeves are essential for protecting muscles and joints during your cycling trips in both winter and summer seasons.

Our RAIN sleeves have a preformed ergonomic fit, rapid wicking away of perspiration, fast drying times and high protection even on rainy days.

They are made of Lombardia DWR fabric, which promotes elasticity and fit while maintaining the correct body temperature and, thanks to the DWR treatment, provides total protection against water.

The raw-cut 20440 fabric in the wrist area combines elasticity with elegance, in fact thanks to its softness it does not compress, providing excellent support during movement.
