PROTECTION

PROTECT YOUR STYLE
DESIGNED AND ENGINEERED IN THE ITALIAN ALPS

S

**THE POWER OF
COLOURS**

ISPO AWARD 2024

WINNER

SERYT has been honored with the prestigious **ISPO Award**, an international recognition celebrating the most innovative products in the sports industry.

This achievement confirms our commitment to quality, research, and forward-thinking design.

Next to this text, we feature the official image of the ISPO Award trophy, symbolizing this remarkable milestone.

Why We Won

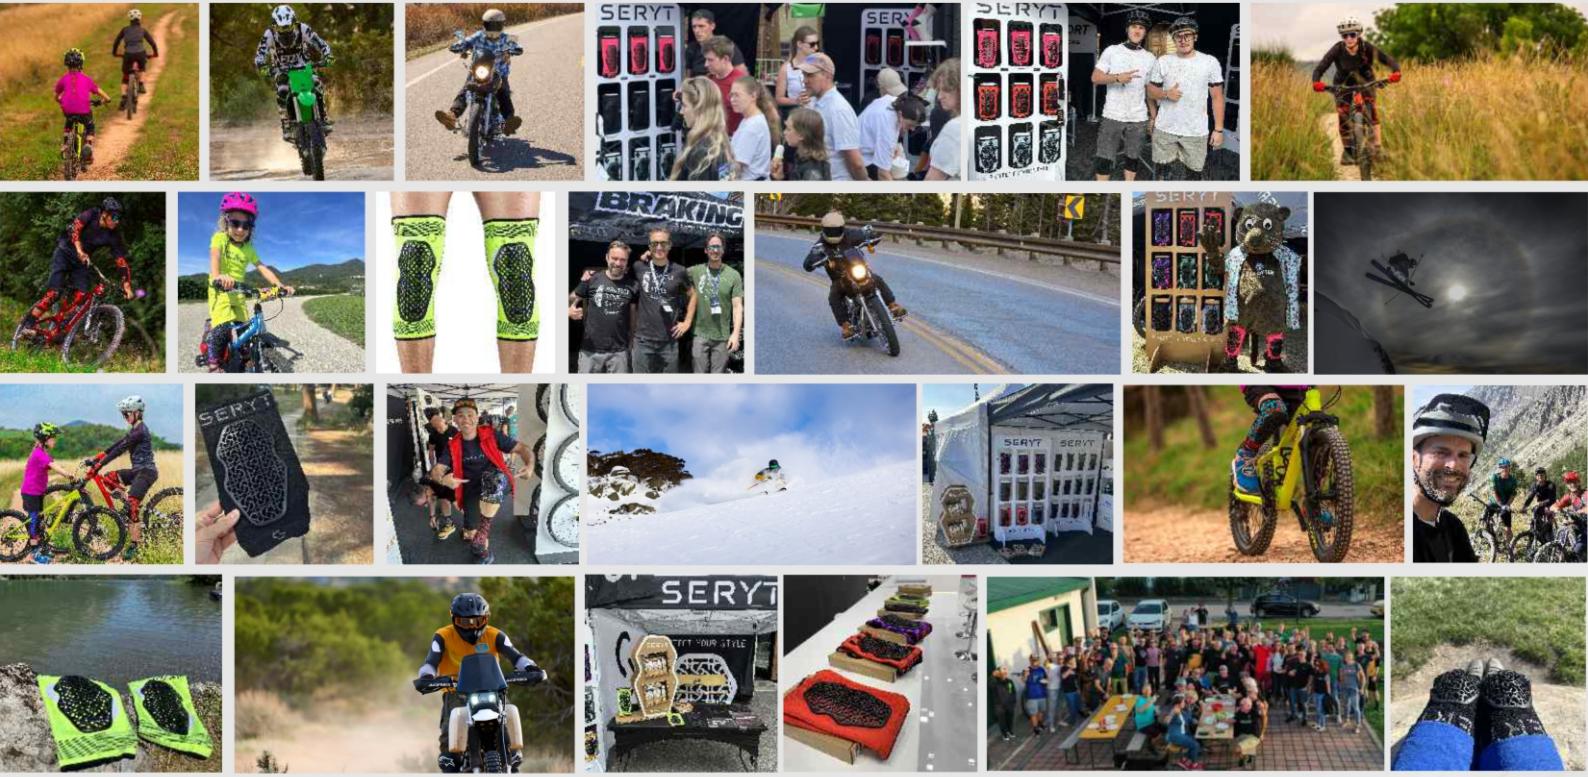

Our product stood out for its unique combination of functionality, design, technology and a real sustainability in packaging. A seamless protection system that ensures superior comfort, natural fit, and reliable performance during every activity.

ISPO Jury Statement

"This product impressed us with its innovative seamless construction and exceptional comfort. It sets a new standard for protective gear in sports."

ISPO AWARD 2024

ABOUT US

At SERYT, we are an Italian team driven by a clear vision: redefining protection as a true expression of personal style.

Born and developed in the heart of the Italian Alps, our products are shaped by the environment that inspires us every single day — steep climbs, fast descents, long alpine touring routes, and the raw energy of motocross circuits. This is why every SERYT product carries the statement **“Designed and Engineered in the Italian Alps.”** It's more than a signature, it's a declaration of who we are and how we build.

We started with a simple idea: create protection that riders genuinely want to wear. Not something bulky or restrictive, but gear that delivers top-tier impact performance while maintaining a clean, modern, unmistakably Italian aesthetic.

From MTB singletrack to enduro racing, from moto touring to full-throttle motocross sessions, our equipment is tested in real conditions by real riders.

This constant cycle of development and feedback has transformed SERYT from an emerging concept into a recognized player in the protection landscape — trusted by athletes, explorers, and style-driven riders around the world.

Our approach blends Italian design sensibility with rigorous testing in the terrain that surrounds us.

Our protection systems use seamless, body-conforming technologies that allow the gear to move naturally with the rider delivering confidence, freedom, and identity on every ride. Because protection should never force you to choose between performance and style.

We create gear for those who ride with intention — **whether it's MTB, Enduro, Moto Touring, or Motocross.**

Protect Your Style.

It's not just our claim, it's our purpose

HOW IT STARTED...

CERTIFICATION STANDARDS

All SERYT protectors meet the **EN1621-1 impact protection standard** and are available in both **Level 1** and **Level 2**

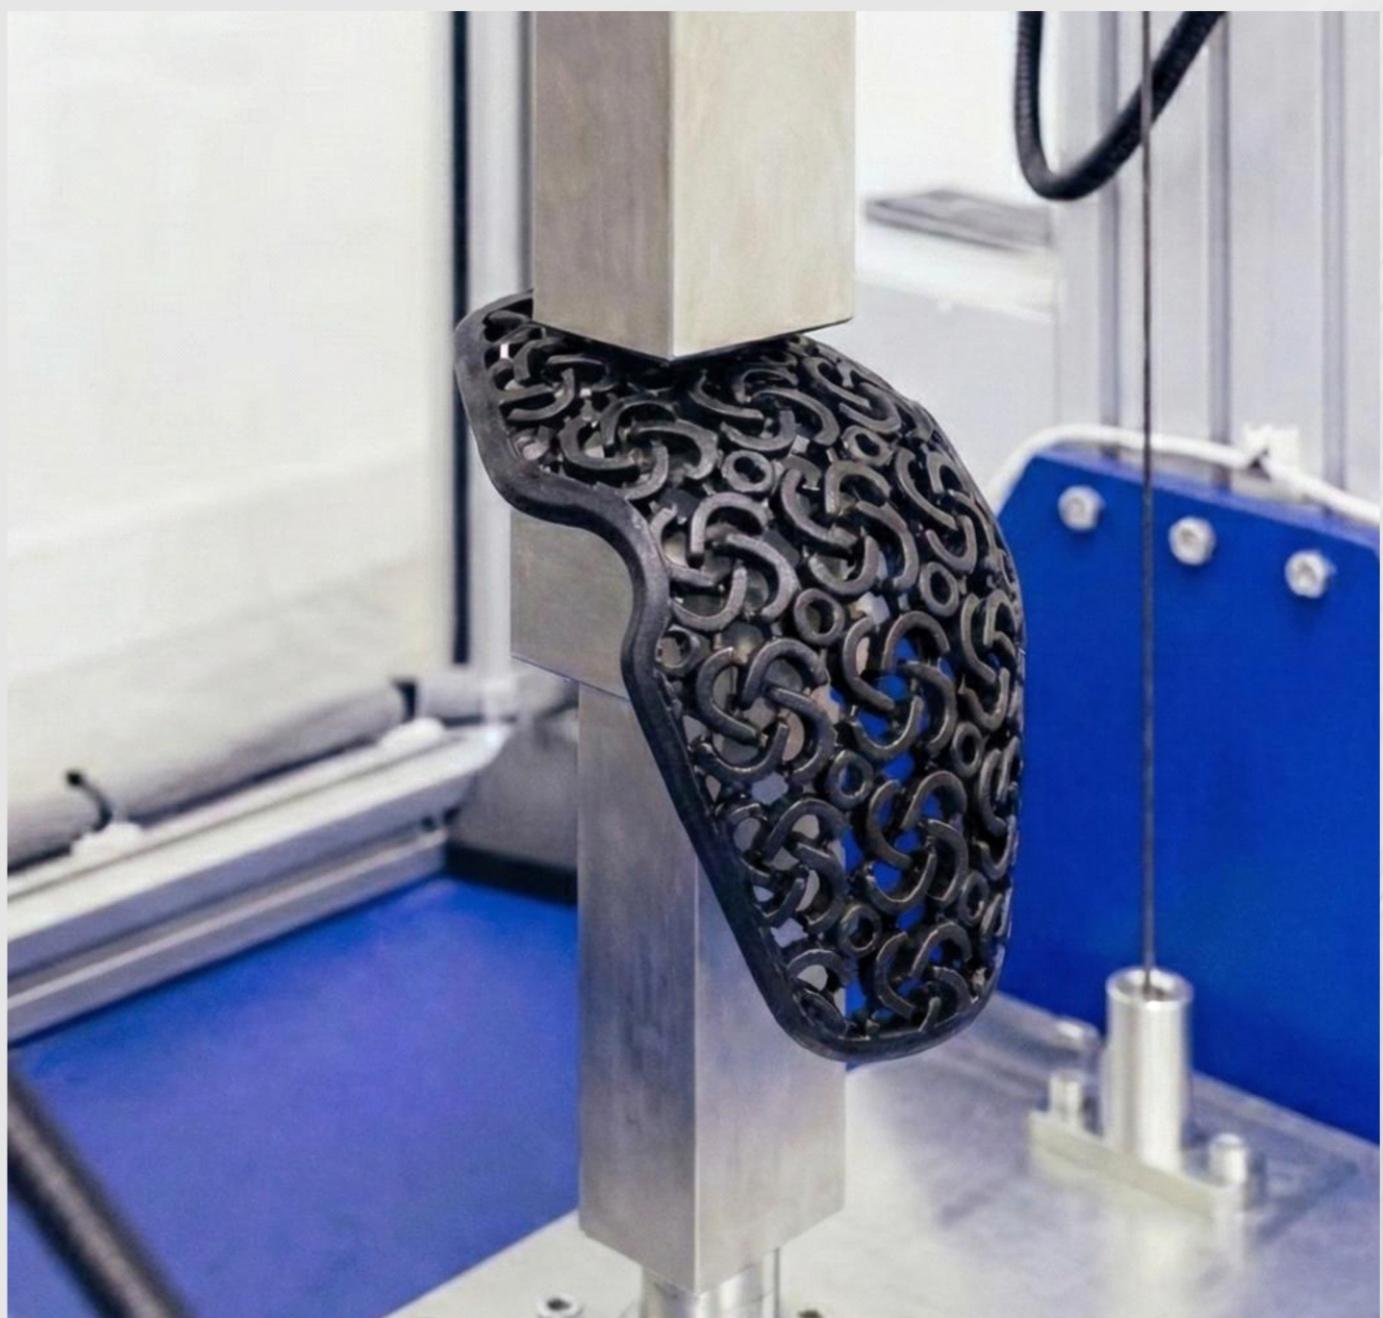

This ensures reliable performance for motorcycle use, including street riding, long-distance touring, off-road adventures, and motocross.

In addition, our protectors have also passed the T- low-temperature impact test, confirming consistent protection even in **sub-zero conditions (tested down to -20°C)**.

This means the protector does not harden, crack, or lose shock absorption when riding in cold mountain climates, winter enduro stages, alpine touring, or early-season motocross.

Despite this level of protection, the design remains thin, flexible, and ergonomic, allowing riders to stay protected without sacrificing comfort or range of motion.

Certified safety , from warm track days to frozen alpine trails.

TECHNOLOGIES

Instead of attaching a separate protective shell, our bio-polymer protection layer is directly injected into the fabric itself, forming one integrated structure.

This eliminates adhesives, layers, and rigid components — creating a protector that is flexible, low-profile, and exceptionally durable.

Designed for moto riders, adventure touring, enduro and MTB who demand performance without bulk.

Direct injections means also more stability while riding and durability.

ULTIMATE SEAMLESS CONSTRUCTION

Our protectors are built using a true seamless construction, which removes bulky stitched seams, laminated patches, and rigid paneling.

Without seams rubbing against the skin, there is no irritation, even during extended hours inside riding pants or armor jackets.

Comfort for the long ride. Stability for the aggressive one.

ENHANCED VENTILATION & HEAT MANAGEMENT

SERYT protectors are engineered with ventilated channels and breathable performance fabric that promote active airflow around the body.

Moisture-wicking fabric help evaporate sweat and maintain a dry contact surface, while the open ventilation geometry reduces heat buildup during climbs, high-intensity sections, or sustained standing riding.

MULTI-DENSITY GEOMETRY

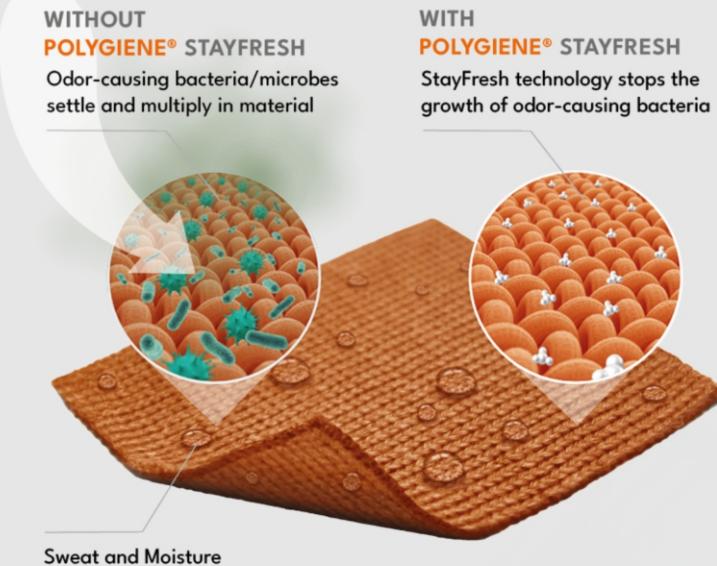

The protective pattern is designed with multiple density zones, strategically placing reinforced geometry at the areas of highest impact while allowing softer, lighter regions where flex and airflow are needed.

This improves:

- Flexibility during movement
- Ventilation across the knee area
- Impact absorption

POLYGIENE ANTI-BACTERIAL TREATMENT

"Sustainability is a prior goal for us in every step of the development"

"Polygiene StayFresh solution has been applied to all our products to reduce washes and cut down water usage"

POLYGIENE FRESHNESS™ FUNCTIONALITY MEETS SUSTAINABILITY.

Polygiene is our first choice when it comes to safe and efficient odor-control technologies. We integrated Polygiene's Freshness technology Polygiene StayFresh™ into the product. Thanks to this, the Knee pad stays hygienically fresh for longer – for your confidence.

HOW DOES THAT WORK?

Polygiene StayFresh™ is a 24/7 working odor - control textile technology that inhibits the growth of odor - causing bacteria that typically cause that unpleasant 'sweat smell'. The solution is based on silver chloride, which occurs naturally in water and soil. Silver ions in the salt prevent bacteria from multiplying and thus also prevent bad odors directly at the source. As Polygiene StayFresh™ is integrated into products at the manufacturing stage, it is only active in the material itself. This ensures it is entirely safe for use in clothing and does not interfere with natural bacteria on the skin.

The result is textiles that feel fresh and require less washing. By washing items less frequently, our customers save water and energy, reduce their environmental footprint and benefit from more durable, longer-lasting products.

Good for you and for the environment.

FLOW KNEE

Product Description

The FLOW Knee protector provides EN1621.1 Level 1 impact protection while maintaining exceptional flexibility, unique colorways and unparallel riding confort.

Key Features:

- Protective pattern made from a high-performance thermoplastic polymer **directly injected** into the socks.
- Special geometry to allow continuous airflow, keeping the knee cool and ventilated even during intense activity, long rides, or warm conditions.
- T- low-temperature impact test, ensuring consistent protection even in cold environments down to -20°C.
- **Total Seamless Construction** - no stitched panels, no rigid edges to ensures a smooth, irritation-free fit under riding pants.
- Lightweight Design with an average weight of just **300 g per pair**, the FLOW Knee pads ranks among the lightest certified protectors in the market.
- Treated with Polygiene® StayFresh™ antibacterial technology, the protector resists odor build-up and reduces the need for frequent washing , ideal for daily riding and travel.
- A silicone anti-slip band ensures the protector stays perfectly in place
- Available in 15 graphic designs and in 3 Sizes (S – M – L/XL)

FLOW ELBOW

Product Description

Certified to EN 1621-1 Level 2, the FLOW Elbow Pad delivers maximum impact absorption while maintaining the best-in-class comfort of our direct-injection technology.

Key Features:

- The geometry of the protection pattern allows continuous airflow, keeping the elbow cool and ventilated even during intense activity, long rides, or warm conditions.
- **T- low-temperature impact test**, ensuring consistent protection even in cold environments down to -20°C.
- **Total Seamless Construction** - no stitched panels, no rigid edges to ensure a smooth, irritation-free fit under riding gear.
- **Lightweight Design** with an average weight of just 250 g per pair, the FLOW Elbow Pad ranks among the lightest Level 2 certified protectors in the market.
- Stay Fresh Technology - Treated with **Polygiene® StayFresh™ antibacterial technology**, the protector resists odor build-up and reduces the need for frequent washing — ideal for daily riding and travel.
- **A silicone anti-slip band** ensures the protector stays perfectly in place, adapting naturally to body movement
- Available in **5 graphic** designs and in 3 Sizes (S – M – L/XL)

YOUTH FLOW KNEE

Product Description

The YOUTH FLOW Knee Pads deliver the same cutting-edge technology and safety standards trusted by adults, designed to protect what matters most: your kids.

Key Features:

- Certified EN 1621.1 Level 2, our knee pads provide the maximum impact protection while ensuring comfort thanks to the **direct injection technology**
- The ventilated protective pattern allows continuous airflow, keeping your child's knees cool and comfortable even during the most active adventures.
- The only certified kids' sports protectors designed with total seamlessness, no seams, no distractions, just protection.
- At just 200 g per pair, these knee pads are among the lightest on the market, so kids can move freely without feeling weighed down.
- Built-in Polygiene® antibacterial technology prevents odors and reduces the need for frequent washing – perfect for daily play and sports.
- A silicone non-slip band ensures a secure, comfortable fit that adapts to every movement.
- Available in 5 graphic designs and in 2 Sizes (5-8 Years / 9-11 Years)

VENTED FLOW KNEE

Product Description

Certified **CE EN 1621-1 Level 2**, the VENTED FLOW Knee Pad are among the lightest protections in the market

Key Features:

- Designed with a rear ventilation opening to optimize airflow and allow natural knee flexion
- The geometry of the protection pattern allows continuous airflow, keeping the knee cool and ventilated even during intense activity, long rides, or warm conditions.
- T- low-temperature impact test, ensuring consistent protection even in cold environments down to -20°C.
- Total Seamless Construction - no stitched panels, no rigid edges to ensure a smooth, irritation-free fit under riding pants.
- Lightweight Design with an average weight of just 220 g per pair, the Flow Knee Pad ranks among the lightest certified protectors in the market.
- A silicone anti-slip band ensures the protector stays perfectly in place
- Available in 3 sizes (S – M – L/XL)

SHELTER PROTECTIVE SOCKS

Product Description

The SHELTER protective socks feature 3 mm rubber-foam padding on the shin, tibia, and malleoli for enhanced impact protection. Made from 90% polyamide and 10% elastane, they offer a durable, supportive, and naturally adaptive fit.

Key Features:

- **3 mm rubber-foam padding** thermoformed and bonded directly to the **shin and ankle zones**, providing targeted protection where impacts are most likely.
- The protective panel is divided into **three articulated segments (21 cm total length)**, ensuring **optimized protection** while allowing the sock to be **easy to put on and take off**, and flexible during movement.
- Slim, lightweight construction integrates seamlessly under motocross boots, touring boots or MTB shoes — no bulk, no restriction.
- Treated with **Polygiene® StayFresh™ antibacterial technology** to prevent odor build-up and reduce the need for frequent washing — ideal for repeated daily use.
- Available in 3 colorways and in 2 Sizes (38-42/ 43-47)

PROTECT TEE

Product Description

A premium organic cotton tee designed to deliver comfort, durability, and a clean, structured look for everyday wear. Featuring the bold “Protect Your Style” graphic, it reflects the SERYT balance of protection, innovation, and individuality

Key Features:

- Crafted from 100% organic cotton (180 g/m²), this premium t-shirt combines comfort, durability, and sustainability in one essential piece.
- The mid-weight organic fabric feels soft against the skin while maintaining a structured, high-quality look, perfect for everyday wear or a relaxed post-riding style.
- The bold “Protect Your Style” graphic is created using high-quality screen printing, ensuring long-lasting colors and sharp details wash after wash. Inspired by the SERYT philosophy, this t-shirt embodies the balance between protection, innovation, and individuality.
- Every element has been carefully chosen to combine durability, comfort, and an effortlessly refined style that stands the test of time.
- Available in 3 Colorways and 4 sizes (S; M; L; XL)

MERCHANDISING AND POP

INSTORE DISPLAY – SRT 10

The SERYT retail display is made from recycled honeycomb cardboard, combining sustainability with a clean, modern design. Lightweight yet durable, it can hold up to 12 product boxes and includes dedicated attachments for hanging socks. An eco-friendly solution that enhances visibility and in-store presentation.

DIMENSIONS:

EVENT DISPLAY – SRT 11

The SERYT event display is made from lightweight sandwich material, offering excellent durability and stability for outdoor environments. Designed as a free-standing structure, it showcases the full range of colors and patterns, ensuring high visibility at events, fairs, and pop-up areas. A practical and eye-catching solution for presenting products in open-air settings.

DIMENSIONS:

SERYT TENT

Roof – SRT 14

White Logo Wall – SRT 15

Black Pattern Wall – SRT 16

4.2 Meters Flag – SRT 17

PACKAGING

THE STORY BEHIND OUR PACKAGING

A long development, a clear vision, and a purpose:
to create packaging that reflects who we are.

We chose high-quality recycled cardboard as the foundation of our packaging.

For us, packaging is the first touchpoint with our customers, so it must embody our values: quality, durability, and respect for the environment.

Designed to Be Seen and Displayed to work everywhere:

- On shelves, thanks to a colored side label with product image and details
- Hanging in stores, thanks to a bioplastic hook integrated on the top

We created a structure that can be easily opened and re-closed, allowing customers to:

- Test the product
- Check the fit
- Touch the materials

All while preserving the packaging and keeping it intact.

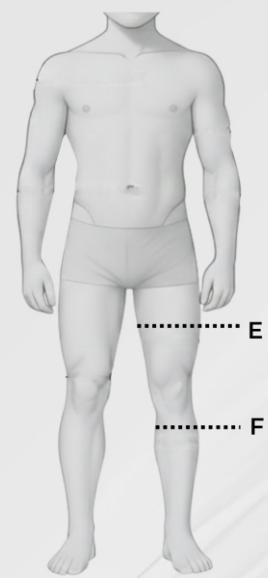

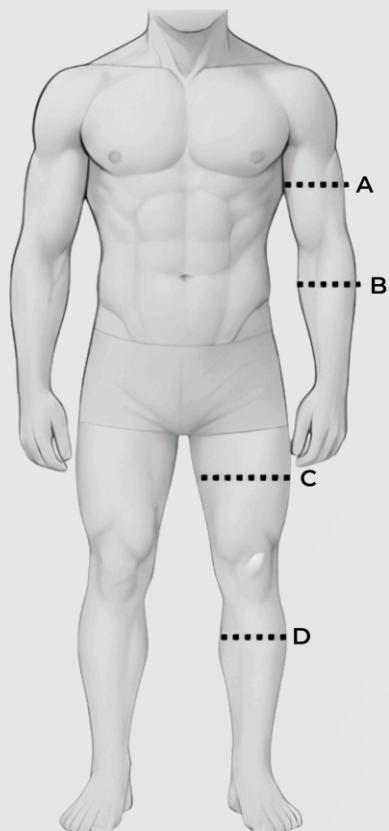

Behind this box lies a long journey of design, testing, and iteration.

Every detail, from the cutout shape to the texture of the cardboard, was developed with one goal:

to elevate the product experience while reducing environmental impact.
